MAXIMIZING YOUR COMPUTING PRODUCTIVITY

Introduction

Maxtang's DT-8803H-B1 embedded fanless industrial PC incorporating the Intel® Core™ Haswell processor, provides a variety of display ports and 16 GPIO, optimizing easy maintenance in industrial automation environments. The series retains the robust design of all Maxtang product lines, at a new extremely cost-effective price point.

The DT-8803H series supports dual-channel DDR3L memory for more powerful computing performance. Along with a versatile I/O array and flexible expansion capacity, the DT-8803H Series fully satisfies all the needs of industrial automation with the performance demanded by vision inspection, motion control, and surveillance applications. Fanless construction not only overcomes contaminant and noise challenges presented by harsh IA environments, the elimination of problematic structural elements that negatively affect MTBF greatly increases lifecycle expectations for the platform.
